- * Synchronize information with your Palm with the free ThoughtManager Reader
- * Show notes in Windows or as a symbol on your Palm using the PalmTec.com web site
- Q: formatting a date with PHP I have a function that is supposed to work this way: If a user enter a date in the form: 02/20/2011, the function should search in the database and return all rows where the date is between 02/20/2011 and 02/21/2011. It should do so, regardless if the dates are stored as a timestamp or as a date. I have not found anything that can do this for me. I managed to get it to work in excel with the following formula: =DATE(YEAR(A1), MONTH(A1), DAY(A1), HOUR(A1), MINUTE(A1), SECOND(A1))-1 that worked from a timestamp. But I have not been able to get it to work with my current code... public function searchKandidat(\$date){ \$this->clearQuery(); \$this->load->model('search_filter'); \$this->load->model('search_data'); \$this->search_filter->search(array('date' => \$date)); \$this->search_data->getData(); } This function is called from a form where a user select his/her date and then submit it: if(\$this->input->post('time')){ \$this->SearchDate->searchKandidat(\$this->input->post('time')); } I made a function that converts a time from the form to a date but it doesn't seems to make a difference. public function convertTimeToDate(\$time){ \$time = str_replace(':', '', \$time); \$se
